

Bella Dura Care and Cleaning

Basic Cleaning

By design, Bella-Dura® fibers resist spills and absorption, so whether it's betadine in a healthcare environment or wine in a restaurant or home, Bella-Dura® is easy to clean. For most spills, a simple solution of two parts water to one part dishwashing detergent (or another common household cleaner) will do. Gently clean the surface using a toothbrush or other soft bristled brush with swirling motions and then rinse thoroughly using clean water.

Spot Cleaning

Bleach Cleaning

Because Bella-Dura® is a solution-dyed fabric, the fibers are bleach cleanable without risk of fading or harm, making even more challenging spills easy to treat. Quickly clean and disinfect using a diluted bleach solution. The recommended dilution is four parts water to one part bleach.
