

Care & Cleaning

Spot Cleaning

Weekly Cleaning

Wipe surfaces with a soft, damp cloth and towel dry. In very weather, cover or remove cushions since seams can trap and absorb moisture. Cushions should be stored in a dry, well-ventilated area.

Special Cleaning Problems

For dirt or stains that cannot be removed with a damp cloth, follow these steps:

Mild Soap and Water Solution. Use mild soap and water solution and if necessary, a soft-bristle brush. Rinse cleaned area with fresh water then dry with a clean, lint-free cloth. **Do Not Use** abrasive powders, steel wool, industrial strength or solvent cleaners, vinyl "conditioners" or "protectors." These products should be avoided on marine products. Undiluted bleach or lacquer can dull or damage the marine product. If in doubt about a detergent or cleaner, test a patch in an inconspicuous place before applying in a larger place. **Caution:** Suntan lotion and insect repellents can cause rapid staining and deterioration of the surface of the product. Remove these products immediately after contact. Wash the area with a mild soap and water solution, rinse with clean, warm water, and towel dry.
