

Care & Cleaning

Spot Cleaning

While the performance features of Nanotex fabric make it easy to clean, it is not self-cleaning. Use the simple instructions below to clean.

1. Blot any excess liquid; wipe away excess mess with a dry, clean towel.
2. Mix together a simple soap and water solution. We recommend mixing $\frac{1}{4}$ teaspoon enzyme laundry or dish detergent, like Tide® or Cheer® with 1 cup warm water.
3. Apply the solution and agitate with a soft bristle brush. Make sure to brush lightly and work from the outside of the stain inward so as not to spread the stain. Rinse your sponge or brush frequently.
4. Blot with a clean towel and rinse. Repeat if necessary.
5. And remember, soap attracts dirt so make sure to rinse thoroughly.
6. Allow fabric to air dry.

Regular Cleaning & Maintenance

To prevent overall soiling, frequent vacuuming or light brushing with a non-metallic, stiff bristle brush to remove dust and grime is recommended.

Pile fabrics may require brushing with a non-metallic, stiff bristle brush to restore plush appearance.
